

WHY ARE ENERGYbits[®] THE BEST PROTEIN?

ENERGYbits[®] are 100% organically grown spirulina algae, which not only has the highest concentration of protein in the world (64% protein) and three times that of steak, but is the **ONLY protein in the world** that **ALSO** contains:

1. **Antioxidants** (which reduces inflammation and speeds healing from workouts or athletics)
2. **Omega 3** (which protects the heart and the brain, especially from concussions)
3. **Chlorophyll** (which is alkaline and builds the immune system)
4. **Electrolytes** (which replenishes and restores the chemical balance of your body).

NO OTHER PROTEIN offers these benefits. NONE. Algae is **THE ONLY PROTEIN** that does this. All this and 40 vitamins/minerals too! And all for ONE calorie per tab.

This is one of the many reasons why ENERGYbits[®] is better than Whey Protein or indeed any other protein! And since algae has ALL these critical components, It will also save you money and time since you won't need to purchase these other things AND our algae will save your body from unnecessary wear and tear – which will allow you to perform or play better and LONGER without injury!
