

THE QUALITY OF OUR ENERGYBITS® ALGAE TABS AND OTHER BITS ARE UNMATCHED

Our ENERGYbits® and SKINNYbits® (spirulina) and RECOVERYbits® (chlorella) and VITALITYbits® (50/50) tabs are 100% pure organically grown NON GMO chlorella pyrenoidsa and 100% pure organically grown NON GMO spirulina platensis . These are the two strains of edible algae that have the highest nutrient density and highest concentration of protein. Ours are grown and sold with absolutely NO sprays, chemicals, fillers, binding agents, additives etc. NOTHING is added and NOTHING is subtracted.

Both of our chlorella and spirulina are cultivated in Taiwan outdoors in direct natural sunlight in state-of-the-art man-made tanks (this is the best and cleanest way to grow chlorella and spirulina) using spring-fed water then they are transferred inside to purified water tanks where they are tested, then dried, then cold-processed into 100% pure tablets.

The tablets are lab tested for radiation, bacteria and heavy metals twice, once before they are shipped, and again once they arrive here in the USA. The FDA now holds and tests food shipments coming from Asian countries before releasing them.

Our testing shows that they are free of radiation and contain less than 5 parts per million in total heavy metals, which means heavy metals are basically non-existent. Our chlorella and spirulina are grown and manufactured in a state-of-the-art facility by our Partner Company who is a Quality Assured Firm ISO 9001 and has been awarded a GMP certificate (Good Manufacturing Procedures).

All radiation tests show our spirulina and chlorella source is free of environmental radiation. All lots are tested and monitored for Iodine-131, Cesium-134, and Cesium-137 and results have always been below the detection level of 0.5 Bq/kg. In fact, a common banana emits more radiation than our algae tabs. (Bananas contain naturally occurring radioactive potassium.)

We apologize, but we no longer provide copies of our certificates as they contain proprietary information, sources, farms, etc. Here at ENERGYbits® Inc. we have spent years researching the best countries, companies, growing techniques, drying techniques and packaging technique and are proud to offer you the cleanest, most powerful, safest chlorella and spirulina available in the world.
